

IN THE SPECIFICATION

Page 3, lines 5-6, please amend as shown below.

Figure 5 is a sectional view taken along line [[4-4]] 5-5, showing only the

5 seal related parts in the insertion configuration.

Page 5, beginning on the second listing of line 1, amend the paragraph as

8 shown below.

Figure 3 has all of the elements of Figure 2 but has an added internal band 12c. The band 12c can be deformed for installation in the position shown, and expanded into final position. The related details are shown by Figures 5 and 6.

Page 5, beginning on the second listing of page 4, amend the paragraph as

15 shown below.

Figure 4 is identical to Figure 3 with grooves on the inner surface of the sleeve 2 in the area 2a contacted by the elastomer sleeve 12. [[inner]] Inner 12c exerts radially outward force on the sleeve 12 to seal and secure bly with or without bonding in the area 12c.
